

Epixel honored for MLM software innovations by TopDevelopers.

Epixel MLM Software won a series of recognitions in 2020 through surveys conducted by TopDevelopers in various technical areas.

Press Release: Nevada U.S. October 10, 2020

TopDevelopers recently published a list of top companies leading the IT industry with expertise in providing tailor-made software solutions. Epixel MLM Software featured in the list as the 'Top Custom Software Development Company'. It had also earned the titles of 'Top Blockchain Development Company' and 'Finest AngularJS Development Company' by TopDevelopers earlier this year.

Epixel has been delivering customized solutions for various MLM industries for over a decade. They excel in creating tailor-made back-office and a wide range of API integration solutions. Simplifying the most complex processes of MLM such as commissions, bonuses, and rank rules with easy configurable options has earned them much recognition among its users. *"The software is very modular and it lets you configure many settings like your compensation bonus details, tax configuration by state, and so on. The content management system was easy to use and it allowed us to add new pages quickly."*, says Steve L, IT Specialist at Inovitta.

They have exposed their expertise in creating blockchain and cryptocurrency solutions contributing to the internationalization of their customers' ever-expanding business. *"I spotted Epixel on initial search itself. They are among the top providers of network marketing software. I feel the team is flexible to make any changes based on my expectation."* says Ronald K, Co-founder, EasyLyf Health Ltd.

Epixel MLM Software, headquartered in India, has been revolutionizing the MLM industry with its innovations in the technical field and has very well addressed the problems faced by the network marketing industry. *"We are very much honored to receive this recognition especially because we have always kept our users' interests as our priority. Our sole aim is to provide a relaxing software experience for our users in the network marketing field. Exactly for the same reason, we are on a mission to transform the MLM industry, which is still in shades of grey, to a mainstream marketing concept. We want the world to explore the immense possibilities of network marketing and direct selling while ensuring transparency and trust in our user's business. We are crafting tools with AI and BI, to identify potential businesses that may turn into scam thus saving the face of the MLM industry"*, says Dhanesh Haridas, Chief Technical Officer, Epixel Solutions.
