

New tools, latest innovations, futuristic technologies - Epixel brings a new phase to the network marketing industry

Press Release: 27 July 2020

Innovation has got new definitions with Team Epixel.

[Las Vegas, Nevada, USA] Who will say no to creative innovations and useful tools with futuristic technologies? We all love innovations especially when it makes our business and life better. Epixel has given new dimensions to the network marketing industry gifting its users a hassle-free experience.

Epixel has launched new tools to help the network marketing industry bring back its supreme power with innovation and technology. A bundle of tools is available for MLM companies to enhance their business by following their vision and mission.

The set of tools available in the latest edition helps companies in prospecting, maintaining customer relationship management (CRM), training distributors, building and promoting business, accounting, recruiting, and much more. All these tools will help both companies and distributors to work easily even from remote environments.

“There is no compromise in three things - the simplicity of usage, latest technologies, and innovations. We implement this trio in every project, no matter how challenging it is. This transcends the scope of our client’s business in the global market creating a brand identity and taking their business to the next level. We passionately strive to offer our customers a competitive edge to stay productive. We’ll notify you of every step we take to make our journey closer to your business dreams. You will find all these tools and features on our [official website](#).” says Dhanesh Haridas, Chief Technical Officer, Epixel Solutions.

Epixel solutions, one of the most popular IT service providers for the past 12 years has created a significant influence among global customers. Their flagship product--Epixel MLM Software--is a breakthrough in their success history. With automation, business intelligence, and other advanced functionalities, the system is on a constant process of innovation year after year.
